Introduction

This **Modern Security Management and Operations Training Program** offers a deep dive into the critical principles of advanced security management. Designed to address modern security challenges, the program equips participants with the skills to establish and uphold effective security policies, enhance risk management strategies, and implement robust access controls. The curriculum emphasizes practical applications of security and risk management techniques, enabling participants to efficiently address and mitigate security threats.

Participants will gain proficiency in identifying potential threats, assessing the effectiveness of controls, evaluating risks, prioritizing based on impact and likelihood, and responding effectively. This comprehensive program prepares professionals to manage daily security operations while aligning with regulatory developments and adapting to dynamic security needs.

Target Audience

This course is designed for:

- **Experienced and non-experienced security managers** seeking to enhance their expertise.
- **Civilian representatives** involved in security operations.
- **Managers and supervisors** responsible for overseeing security programs.
- **Risk management personnel** aiming to integrate security into broader risk frameworks.

Course Objectives

By the end of this advanced security management course, participants will be able to:

- Apply foundational management principles within the context of security operations.
- Plan, develop, and manage human and material resources for effective security unit operations.
- Create and oversee the implementation of security programs and standard operating procedures (SOPs).
- Ensure security personnel are proficient in executing preventive security measures.
- Provide expert consultation on emergency planning and security responses across various facilities.

Targeted Competencies

Participants will develop:

- Proficiency in responding to security incidents.
- The ability to interpret and apply international regulatory requirements.
- Skills to elevate professionalism through effective procedures.
- Expertise in identifying and managing security risks.
- The capability to craft risk matrices and assess the consequences of potential events.

Course Content

Unit 1: Security Risk Management Framework

- Principles of security risk management.
- Loss prevention techniques.
- Security surveillance and management frameworks.
- Advanced physical security resource management.
- Strategies for building and perimeter security.

Unit 2: Addressing Challenges in Security Operations

- Job requirements and recruiting criteria for security personnel.
- Methods for motivating staff and providing constructive feedback.
- Deployment, briefing, and supervision of security teams.
- Techniques for accurate staff performance assessments.
- Identifying threats to physical security.
- Conducting risk assessments (RA) and security vulnerability assessments (SVA).

Unit 3: Access Control and Physical Monitoring

- Advanced use of electronic intruder detection systems.
- Contingency planning for unexpected security events.
- Acquisition and management of physical security assets.
- Best practices in CCTV operations.
- Maintenance and operational guidelines for physical security resources.
- Techniques for maintaining situational awareness.

Unit 4: Security Planning and Investigations

- Creating and implementing security and emergency plans.
- Responding to major security emergencies.
- Evaluating cost-effectiveness in resource allocation.
- Integrating life-cycle, warranty, and preventive maintenance into security planning.
- Industry-standard investigation methodologies.

Unit 5: Information Security

- Balancing public facilitation with stringent security measures.
- Security management systems (SMS) frameworks.
- Fundamentals of close protection.
- Resource support planning and integration.
- Merging physical security with information technology for holistic protection.

This **Security Management and Operations Training Program** provides participants with the tools to excel in modern security roles. Through a comprehensive curriculum, professionals will gain the knowledge and skills required to lead security operations confidently and effectively in a dynamic and challenging environment.
